

Guide to Invoices

2024-06-26

This guide will explain how to create & send invoices in Pure Harvest. For help about the Invoice PDF sections and meaning, see the **Invoice to your Customers** help document.

In Pure Harvest, Charges can be created at any time against a particular sample, seed lot, field, or associate. When it's time to create an invoice, existing charges are assigned to an invoice number then the invoice is created.

Step 1 - Create the Charges

Charges and/or credits can be created and applied to customers account in different ways. You can manually add any charges/credits to an associates account from the **Billing** \rightarrow **Associate Accounts** screen.

You can also create charges on a sample, which will be applied to the "Bill To" Associate as defined for that sample. Charges on a sample can be created manually, or by using the Bill Sample function as provided by PH, See **Setting Up Fees for Tests (and Services)** help document for more information.

Step 2 - Create the Invoice

Invoices can be created in one of two ways, either individually by customer or in a batch by date range. This section will cover both.

By Customer

Using the **Billing** \rightarrow **Associate Accts** screen, on the Open Charges tab there is a [Create Invoice] Link. This will bring up the charges which you can select to include on the invoice. Once you have created the invoice, you can open a link to view the PDF, or if you've made any mistakes, you can remove the invoice, and the charges will be set to "Open".

By Date

Using the **Billing** \rightarrow **Billing Periods** screen, you can enter a close date & a due date, and the system will find every customer that has charges on or before the close date that have not already been invoiced. As it goes through each customer, an invoice will be created which will include all of the open charges/credits and apply them to the invoice. After it is done, the screen will list all of the newly created invoices which can be selected and printed to file.

If a mistake is made, you can use the [Rollback Invoices] period which will find all the invoices with the most recent invoice date, and remove them, setting the charges back to "Open".

Step 3 - Email Invoices

Once you have created your invoice/invoices you can go to the **Billing** \rightarrow **Invoices** screen, and on the Email Invoices tab, you can select the invoices you wish to email.

You may need to change the filter to see your invoices, and only the customers who have an Email address defined with type "Invoice PDF" will be shown on this tab. Invoices can be selected and sent out for those customers.

Associate	Invoice	Date Of	Printed	Emailed	Emails
Ci	L34598 [PDF ^[II]] 106.00, New Balance:259.00	01/31/15	02/02/15		j:r@s

M	L34756 [PDF @] 35.00, New Balance:35.00	05/31/15	06/04/15		w_@t
Pt	L34840 [PDF @] 77.00, New Balance:77.00	08/31/15	09/01/15		r :@p

Step 4 - Enter Payments

See the **Billing** \rightarrow **Payments** screen and the **Payments** help document for more information.

After you have sent out invoices, and payments have started coming in you can enter those from the Payments screen.

Most commonly the customer will be sending a payment for a single invoice, for that you can use the Quick Pay tab. Enter the invoice number the customer is paying off, and the form will automatically fill in the Associate information, and the amount from the invoice. If the amount suggested on the form matches the amount of the check/payment, then just enter the Check # as the reference (or some other identifier if it was paid in other means). If the amount on the check does not match the amount on the form, you can manually enter a different amount before applying the payment.

Some customers may have multiple accounts in your system (i.e. for the various city branches of the company) and one branch will send a single check that pays off invoices for multiple accounts. For that you would use the Advanced tab, which would allow you to split the payment and apply it to various invoices across multiple accounts.

See the **Payments** help document for more details on splitting a payment.
