

02/15/2023 PhelpDirectoryGuide

The “phelp” directory contains pdf files organized in subfolders. Different subfolders may have different access rights. In order to have full searching permissions, you must arrive here by using a link from the Pure Harvest application. It will pass your user name and license name into this page. These will be used to determine your permissions.

These files have replaced the documentation in the PH Wiki.

You can search on

- Directory For the general category of help
- Lookback For files the have change recently
- and Anywhere full text search (not case sensitive)

Directory : Do Rescan Show PDF

Lookback: Days (Shows files in the given Directory that have changed in X days)

Anywhere Search:

You can restrict your search to one of the Directories in the drop list.

Version 12/23/2022

#	Group	Dir
1	phapp	guides

- phapp/admin
- phapp/exports
- phapp/fields
- phapp/financial
- phapp/guides
- phapp/organic
- phapp/regulatory
- phapp/seedlab
- phapp/ToFile/archived
- phapp/xt
- phapp/phadmin
- phapp/phpromo

The search results will show a summary of the document if it has been defined. It will show some or all PDF’s depending on the settings. This is slower because it has to move all the PDF’s to your browser.

#	Group	Dir	Link	
1	phapp	guides	[PhelpDirectoryGuide.pdf] 2022-07-22 19:33	 7/21/2022 The "phelp" directory contains pdf files
2	phapp	xt	[Bulk-Lot-Transactions-ext.pdf] 2022-06-02 10:04	 Bulk L <hr/> Bulk Lot Transactions This guide will cover the process of creating bulk

Admin Priveleges

If you login with admin/edit priveliges you will see this at the top:
 It has a drop list for access level, but it does not do anything yet.

Directory : Do Rescan Access Level Show PDF
 Lookback: Days (Shows files in the given Directory that have changed in X days)
 Anywhere Search:

You can rescan some or all of the directories. I usually rescan them all. It is fast and doesn't miss any.

Directory : Do Rescan

Technical

This page has a lot of parts that are still under development. When that work is complete we will make it available for customer use under their own domain.

The particular file is created in MS Word and saved as a PDF. When the pdf is placed on the server, the file is converted to text and analyzed for the presence of words that can be quickly searched.

The file name should have no spaces and capitalize words that are part of the name. This will give a consistent look and is easy to read.

You may change your version of the file and upload that. It will be stored under its original name.
