

Features

Pure Harvest software is a powerful tool which offers data management & reporting solutions for Seed Labs, Certifying Agencies, Regulatory Agencies, and Field Inspections.

Below is just some of what Pure Harvest can do.

General

- User Friendly Interface
- Responsive look-ups
- Quick setup, low startup costs. No hardware to buy.
- Generate various reports to send to customers.
- Automatic emailing of results & reports.
- Generate Data Exports & Reports for internal use.
 - Compatible with Excel, or for loading into other database systems.
- Manage Crops & Variety data including
 - Rules/Methods (AOSA, ISTA, Canadian)
 - Characteristics
 - Experimental variety tracking.
- Customer Portal
 - Online Interface for your customers to access results or to submit requests.

Seed Labs

See [Seed Labs](#) for more detail

- Comes with many predefined tests, additional custom tests can be added
- Built-in Calculations for certain tests.
- Generate various types of Lab reports (Customization available upon request)
- Manage pricing & fees for billing sample tests
- Create Lab Cards and Labels for individual samples or in batch
- Numerous Data Exports & Reports of Lab Activity
- **Regulatory Testing**
 - Easily entered labelled values
 - Compare labelled values with tested values, set the IN/OUT compliance.
 - PH will suggest the IN/OUT compliance based on tolerance tables.
- Customer Portal
 - Online interfaces for customers to access results & reports
 - Import information from samples submitted online via customer portal.
 - Daily summary emails list samples started and completed that day.
 - **Import Samples Submitted Online.** See [Online Samples for more](#)

Field Inspection

See [Field Inspection](#) for more details

- Report Inspection results (acres passed/rejected)
- Define Custom Inspection Plans (e.g. Lists of diseases to inspect for)
- Create your own PDF Inspection Form Templates.
 - Inspectors can send data & PDF directly back to PH without logging in.
- Generate Reports such as Supervisor Field Listing.

- Use field numbers to create new seed lots in the system.
- Track lots through the process of certification.
- Enter GPS coordinates for generating maps of fields
- Various Exports of field data
- Customer Portal
 - View Inspection Results online
 - Submit Field Inspection Applications online

Certification

- Create & Manage Seed Lots & Seed Lot Transactions
- Generate Certificates such as the OECD Certificate.
- Create Inventory lots for customers to use to create Bulk Sales Certificates from the Customer portal.
- Full Cycle tracking of a lot
 - Field(s) to Lot(s) to Sample(s) to Certification to Field.
- Customer Portal
 - View Certification Reports online
 - Submit Tag Requests online

Billing

- Define fees for tests on samples or acreage fees for field inspections.
 - A single price can be set for the fee, or varying prices by Crops or Groups of Crops.
- Create charges on a customer account from samples or fields.
 - These can be generated by the system using the defined fees, or entered manually.
- Create invoices from charges, either as a batch by time period (week,month,quarter,etc) or individually by customer at anytime
 - Invoices can be created as a stand-alone bill, only showing amount owed for fees on that invoice, or as a running account balance, which includes the previous unpaid balance, if any.
 - Account Balance invoice includes a history section showing past recent invoices & payments
- Send detailed invoices to customers by email.
- Various Exports & Reports for internal use including, but not limited to:
 - Billing Period summary - Charges & Credits listed by customer & totals for the time period.
 - Account Aging - Identify Customers in arrears.
 - History of Invoices & Payments by customer
- Enter payments against specific invoices or against the account balance.

Customer Portal

See [Customer Portal](#) for more details

- Individual user Logins
- Results can be viewed online
- Online Submission of Samples & Field Inspection Applications
 - Additional Online Forms can be customized upon request.
- Share Results between customer accounts, allowing users from different accounts to view the same results

Other Features

Pure Harvest also offers support for:

- Organics Process Certification
- Variety Assessment Fees
- Foundation Seed Sales
