## Aging

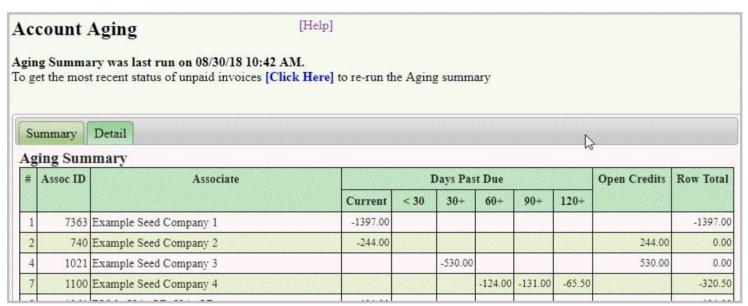

This screen shows the balance aging for each customer by charge type.

The screen shows the last time the Account Aging balances were calculated and has a link to rerun the aging calculations to get the most recent status of unpaid invoices.

## Summary

The summary tab shows an overview of the aging data. It lists one customer per row, and includes all customers with an unpaid invoice at the time the account aging data was calculated. The age of the balance is indicated by its column.

- · Current This column shows the balance due from invoices that have been sent out but are not past due.
- <30 Balance of invoices less than 30 days past due
- 30+ Balance of invoices 30 or more days past due
- 60+ Balance of invoices 60 or more days past due
- 90+ Balance of invoices 90 or more days past due
- 120+ Balance of invoices 120 or more days past due
- Open Credits Payments/Credits that have been made after the most recent invoice.
- Row Total Sum of all columns, if the Row Total is 0, the customer has paid any outstanding balance, Negative balance indicates amount due, positive
  indicates a credit on the account.

## Detail

The summary tab shows the totals of balances based on days old, this tab shows the individual invoices that make up those balances, and exactly how many days past due the invoice is.

Aging Detail							
#	Assoc ID	Associate	Invoice	Date	Due	Days Old	Amount
1	7363	Example Seed Company 1	L3743	07/31/18	08/31/18	Current	-1397.00
