Define Fees

Most PH customers will have one "Fund" which is lab. To choose a fee, use the drop-down list. The first choice is "Add a new fee", but others are in the drop down. Choose a fee from the list.

Lab fees should match existing test names

There are multiple ways to define fees in PH.

- By Sample Same price for all samples
- By Crop
- By Crop Group
- By Variety

In order to support legacy pricing, by default the **LARGEST** fee will be used if more than one fee definition is found (if a fee is defined as $10 per sample, but also has a crop fee of $8 for wheat, the crop fee will be ignored and the default $10 fee will be used instead. Customers that wish to use hierarchical ricing will need to contact support.
