# Sample Search

2024-07-03

Menu: Seed Lab → Sample Search

Search for a Sample, Service, or Regulatory, from this screen. Displays up to 50 samples per page.

[-] Sample Search		

Filters with * will be exact matches, others will be partial ("Co" matches "Corn" not "Acorn")

* Owner/Billed To [   ]

| Lab Number [   ] | Lot Number [   ] | Crop/Variety [   ] |
| Test Name [   ] | Status [▼] | * Seed Class [▼] |

Filters

Some filters require an exact match, others allow partial matches. Use the **%** symbol as a wild-card.

Samples can be filtered on:

- Owner/Billed To - Only shows samples belonging to specified associate.
- Lab Number - Matches lab numbers starting with term entered.
- Lot Number - Matches lot numbers starting with term entered.
- Inspection # - Matches inspection numbers (regulatory samples) starting with term entered.
- Crop/Variety - Case sensitive, matches a crop or variety starting with term entered.
- Test Name - Matches any requested test on the sample.
- Status - Restrict result to Passed, Failed, Completed, Incomplete, or Preliminary Samples.
- Seed Class - Restrict to samples with the specified seed class.

External View tech note

There is an external (xt) user view of samples. For some labs samples will not go out until a release time is set. This is determined by sys.release.auto (yes/no) and sys.release.delay , an interval of time.

See function select_samples($i_filter) in
xt/list_samples.php
